

# General Ledger Posting in the backend system using SAP iRPA

## Challenge

The current process of posting GL into SAP ECC is manual, repetitive and time consuming. In some cases, there are chances of errors. So, business team wanted a faster, error-proof solution.

## Solution

SAP Intelligent Robotic Process Automation Services, has been able to rapidly create an RPA bot, automating the finance GL posting process into ECC without manual intervention

### Systems:

SAP (Financials), MS Office(Excel)

## Outcome

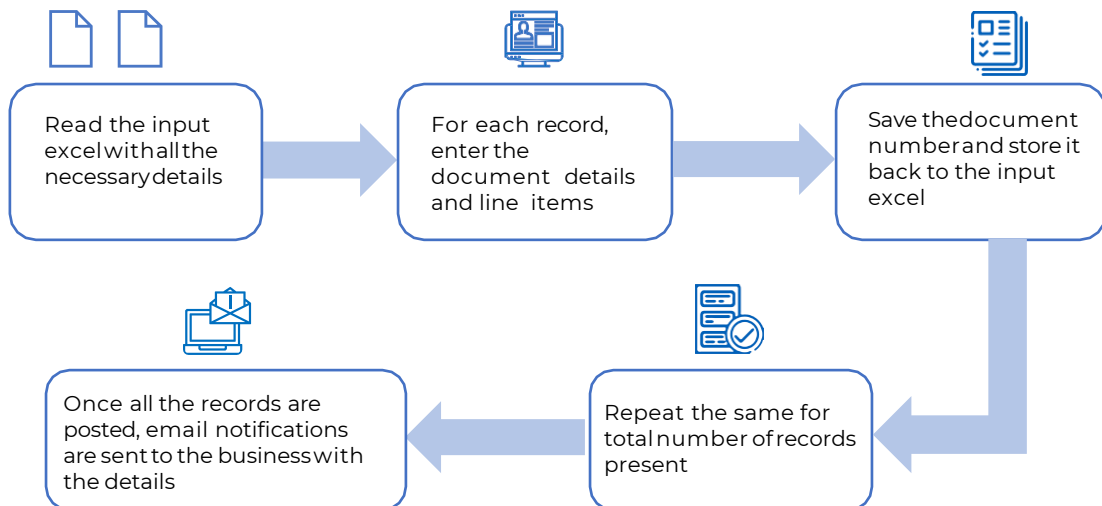

- Efficiency and Accuracy –Less time consumption for posting of GL data into SAP
- Lower costs, reduce manual data keying
- Error free process

### Business Impact

- 75%** Faster upload of general ledger entries
- 80%** Increased accuracy & reduced error
- 700+** Hours saved per year

## Workflow

## Murphy TeamSpeak

*"I am so very excited about the time saved using the robotic process automation, ... I look forward to how this could potentially change our processes and make Murphy more efficient." –Brittany Witt*

*"Big Milestone. RPA can transform how we do business. Great work team!" –Francisco Garcia*
