

Viatrix empowers people worldwide to live healthier at every stage of life. The company provides access to medicines, advance sustainable operations, develop innovative solutions and leverage their collective expertise to improve patient health.

Intelligent Maintenance and Operations

🔍 Challenge

- Paper-based, time consuming process of calibration
- Lack of end-to-end visibility
- Lack of timely alerts and notifications to the users
- Manual process to update data in SAP ECC post calibration completion
- Long and tedious task to update UI screens based on new business requirements

⚙️ Solution

- Work order management for work order/job queue, TECO, time confirmation, release and close work order
- Create, search & view notifications including Maintenance Request, Activity Report, Malfunction Reports.
- Spare parts search with component information
- Reports for plant compliance, work orders, equipment and labor hours
- Mobile application with geospatial capabilities for employee and plant equipment
- User friendly dashboard with visibility of work orders, spare parts and reports

💡 Business Impact

25% Reduction in time for safety critical inspections

20% Increase in employee engagement
