A photograph of three people in a modern office setting. A man in a blue and white striped shirt is on the left, smiling and looking at a tablet. A man with glasses and a white patterned shirt is in the middle, also smiling and looking at the tablet. A woman in a yellow shirt is on the right, smiling and looking at the tablet. The background shows a bright, modern office with large windows and glass partitions. There are semi-transparent green and blue overlays on the image.

Digital Portfolio

Digital Portfolio

#WorkGetsDone

Cherrywork® is a suite of digital applications delivering business value with agility, security and at scale to address complex requirements of enterprises, while keeping the digital core clean.

Digital Transformation Services

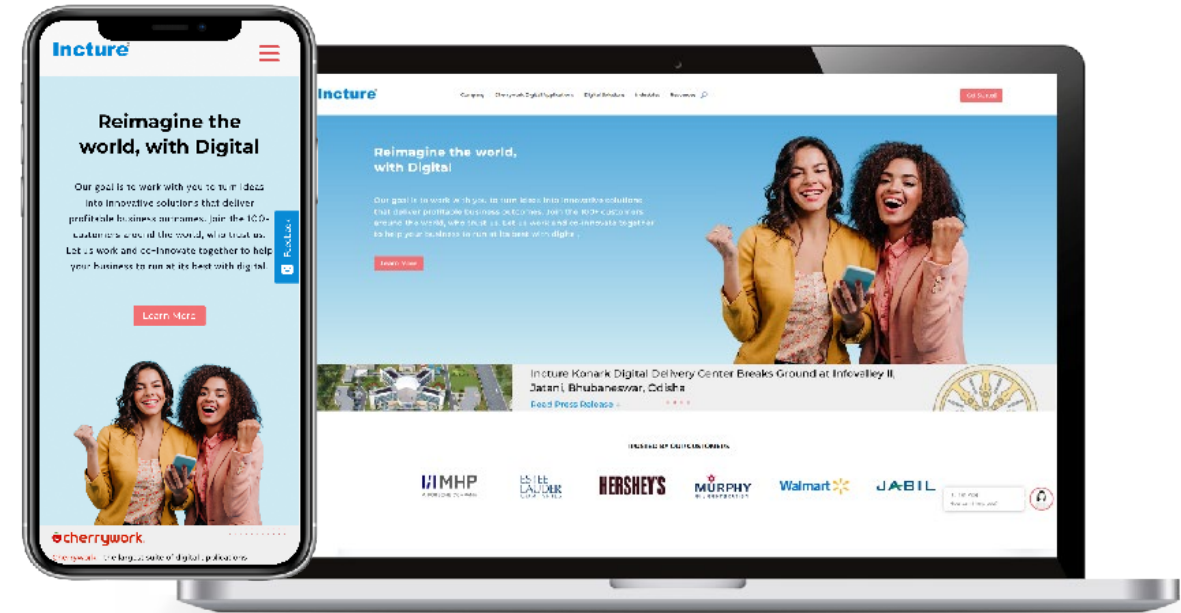

#BusinessGetsDigital

Digital Transformation Services includes cloud transformation, custom application development and managed services for transforming businesses into intelligent enterprises.

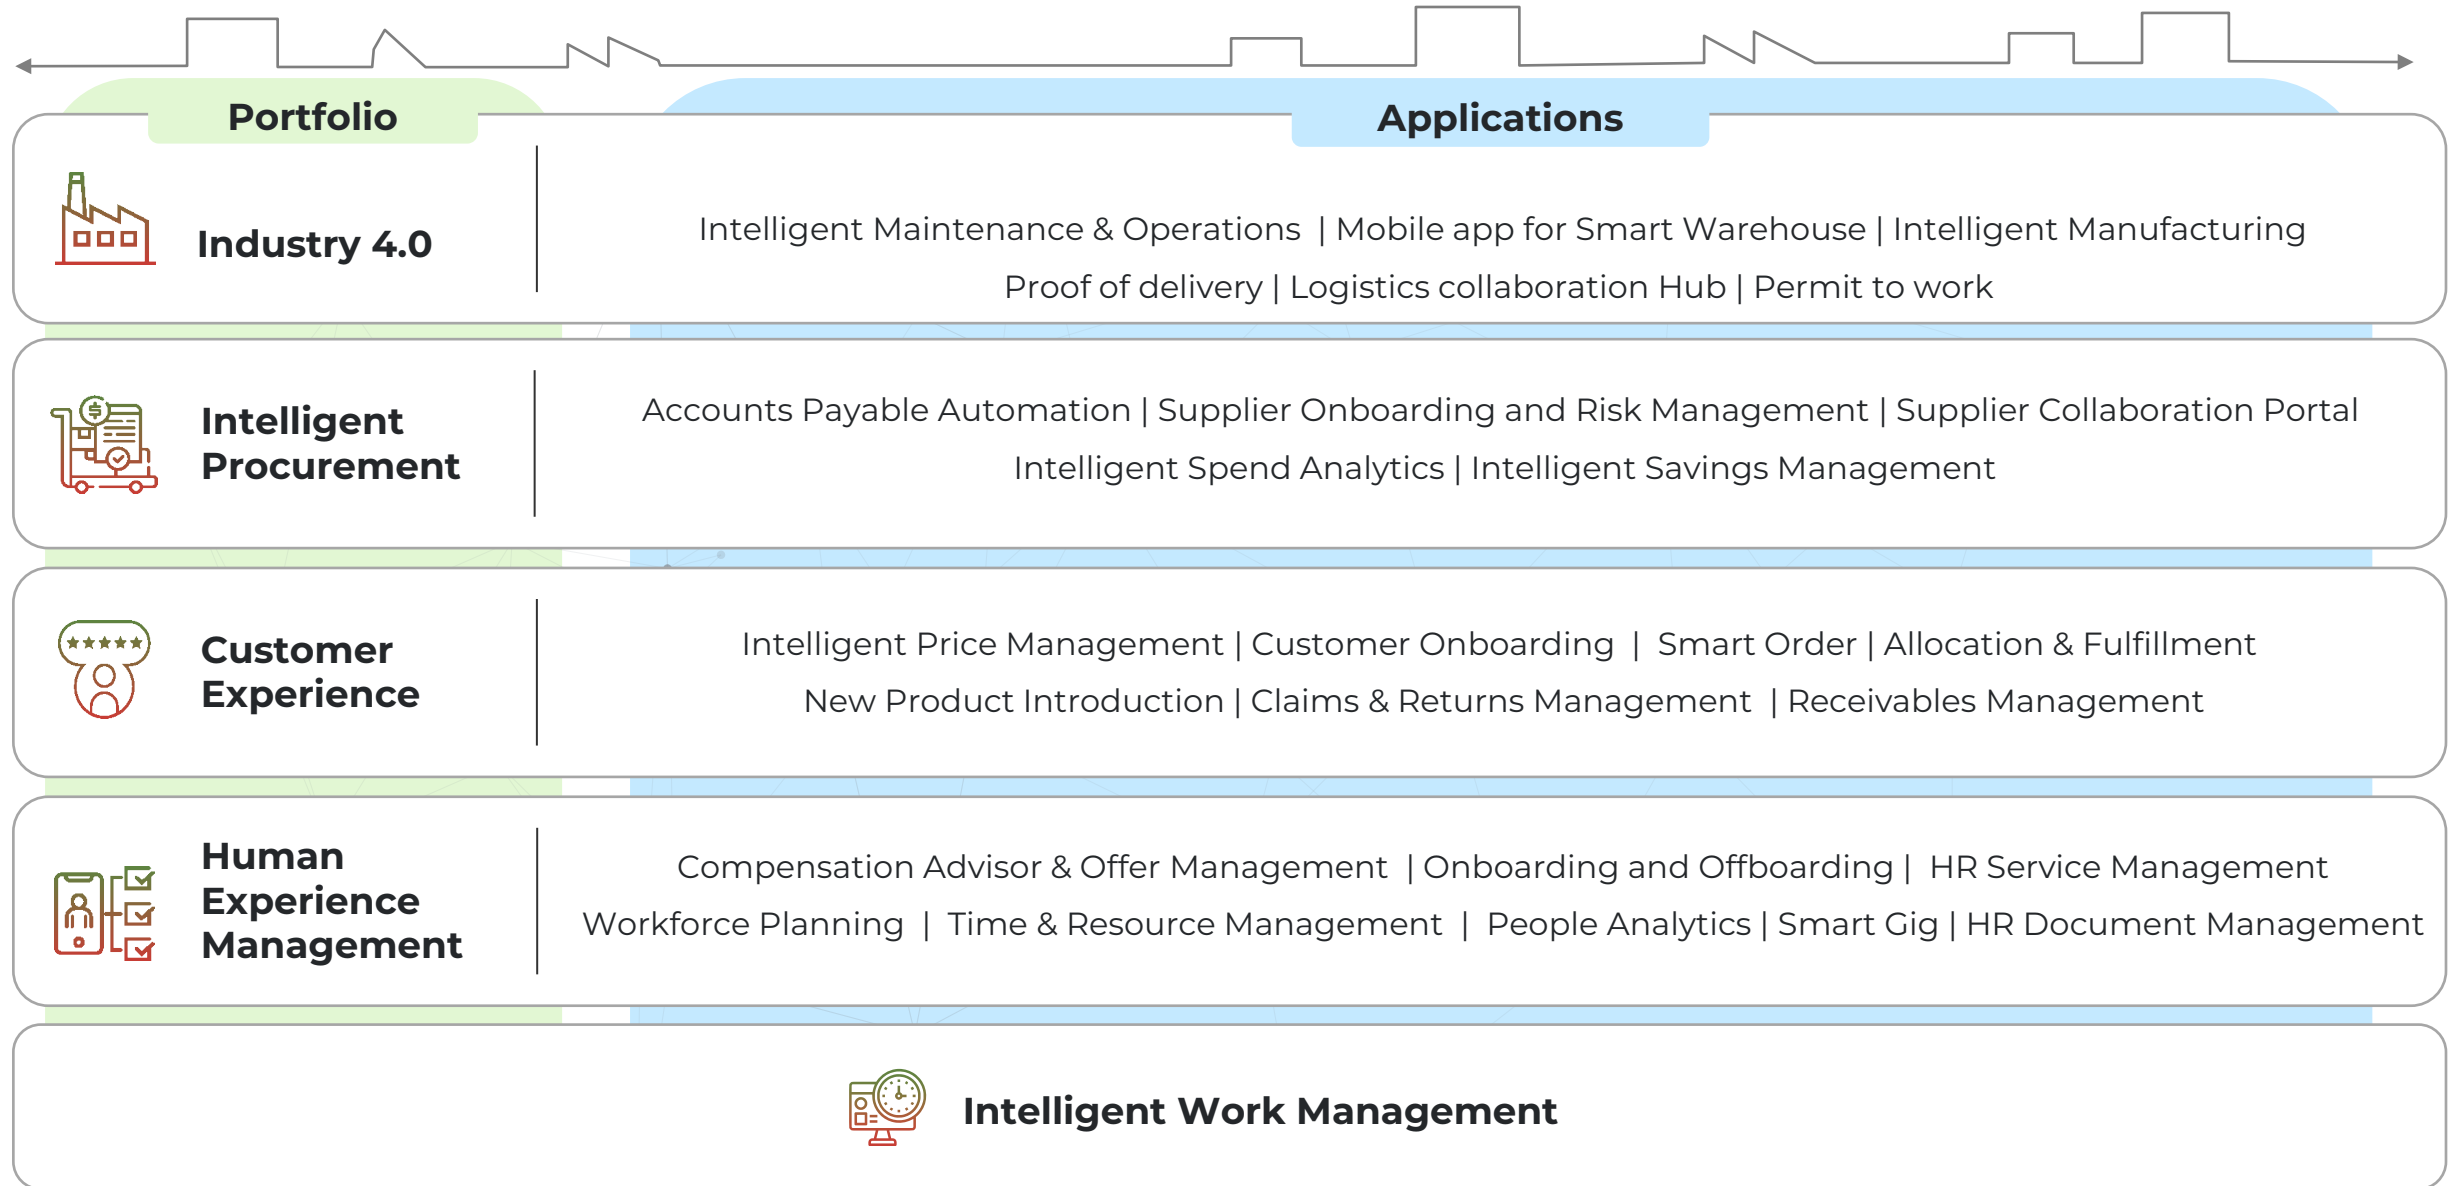

SAP Core Services

#SAPCoreServices

SAP Core Services include managing SAP S/4 HANA investments with implementation and rollouts, covering solution design, deployment, integration, change management, and support.

Cherrywork Digital Applications Portfolio

Cherrywork Advantage

Pre-built content

Extensive suite of pre-packaged digital applications

Tailored for user roles

Connect and align distributed workforce across departments

Domain & Industry expertise

Deep knowledge in business scenarios and industry use cases

Strong digital core

Integration with core SAP and non-SAP systems and cloud applications

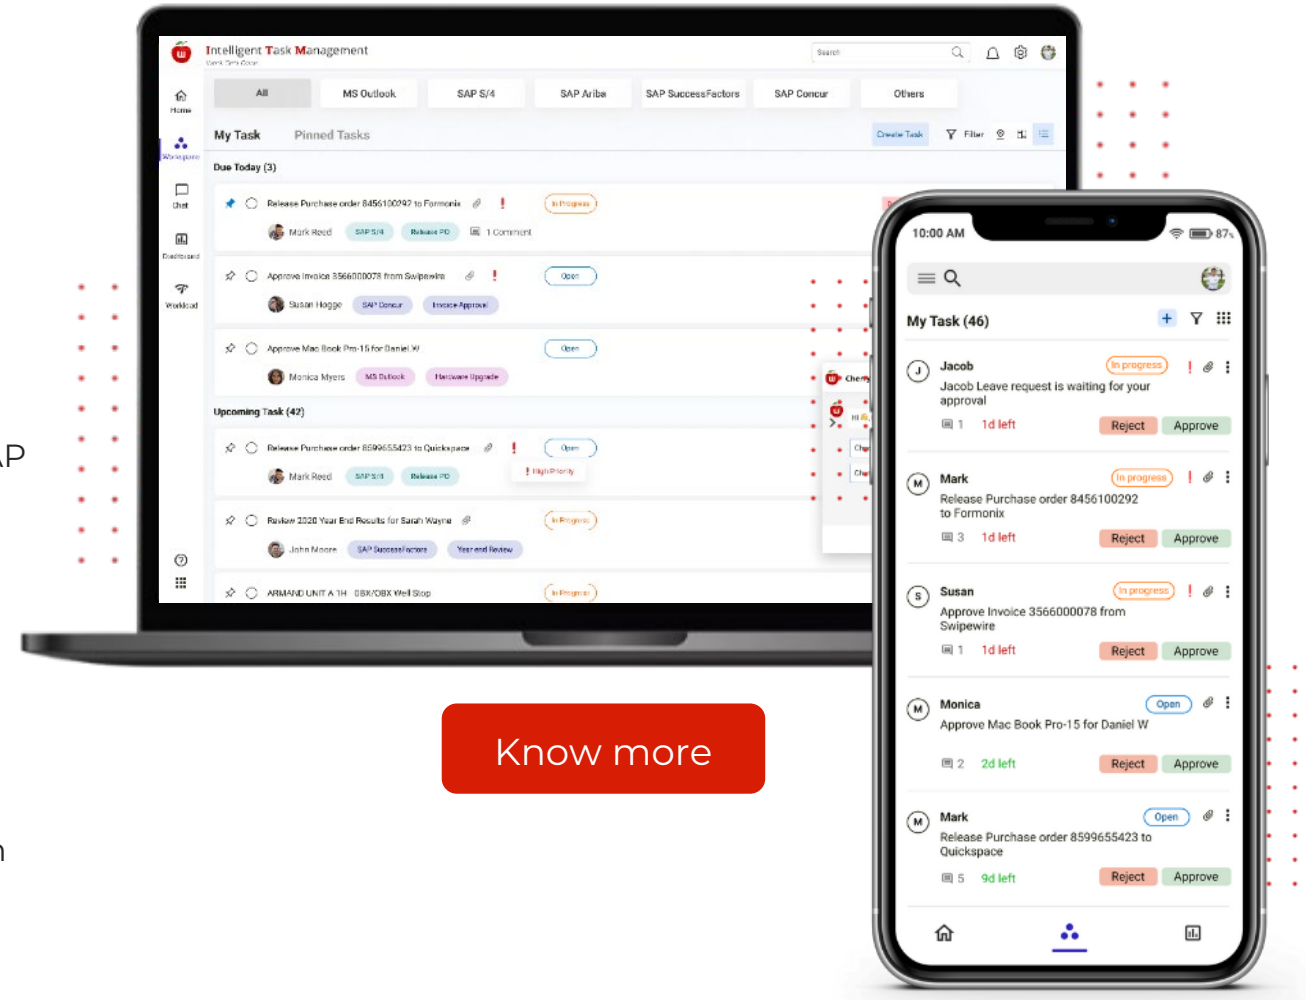

Extensible on hyperscale platforms

Deploy on Amazon Web Services, Google Cloud Platform, and Microsoft Azure

Intelligent automation

Unify enterprise silos with hyper automation of tasks and processes

Know more

Digital Transformation Services

Our ability to craft solutions that transform the way businesses work is rooted in a deep understanding and passion for technology.

- Optimize process and increase workforce efficiency
- Modernize business to increase revenue

- Deliver personalized products and services
- Digitize manual operations

- Improve customer service based on real-time data
- Respond effectively to demand and supply changes

Hyperscale Platforms

Open Standards Technology Stack

The logo for SAP Business Technology Platform (BTP), featuring the text 'POWERING SAP BTP' in white on a blue square background.The Microsoft Azure logo, consisting of four colored squares (red, green, blue, yellow) and the text 'Microsoft Azure' in grey.

The Amazon Web Services (AWS) logo, featuring the word 'aws' in black with an orange curved arrow underneath.

The Google Cloud logo, featuring a stylized cloud shape composed of four colored segments (red, yellow, green, blue).

SAP Core Services

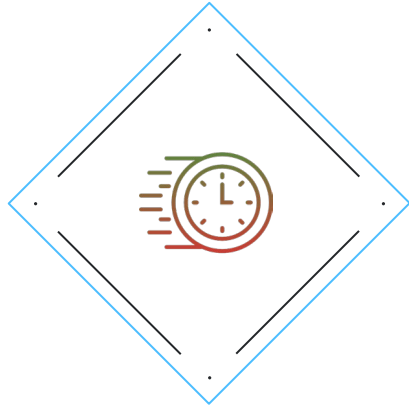

A comprehensive approach to managing core system functionality for SAP enterprise applications

Proven best practices

Comes with business processes that incorporate **industry standard best practices**

Fast time to value

Gets you started quickly using a **guided implementation process**, fast technical setup, and role-based, intuitive interface

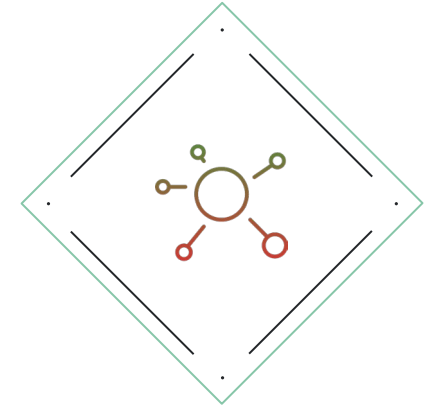

Continuous innovation

Built-in **artificial intelligence (AI)**, **machine learning (ML)**, **process automation (RPA)**, and **analytics** so your business operates better

Security, compliance, and scalability

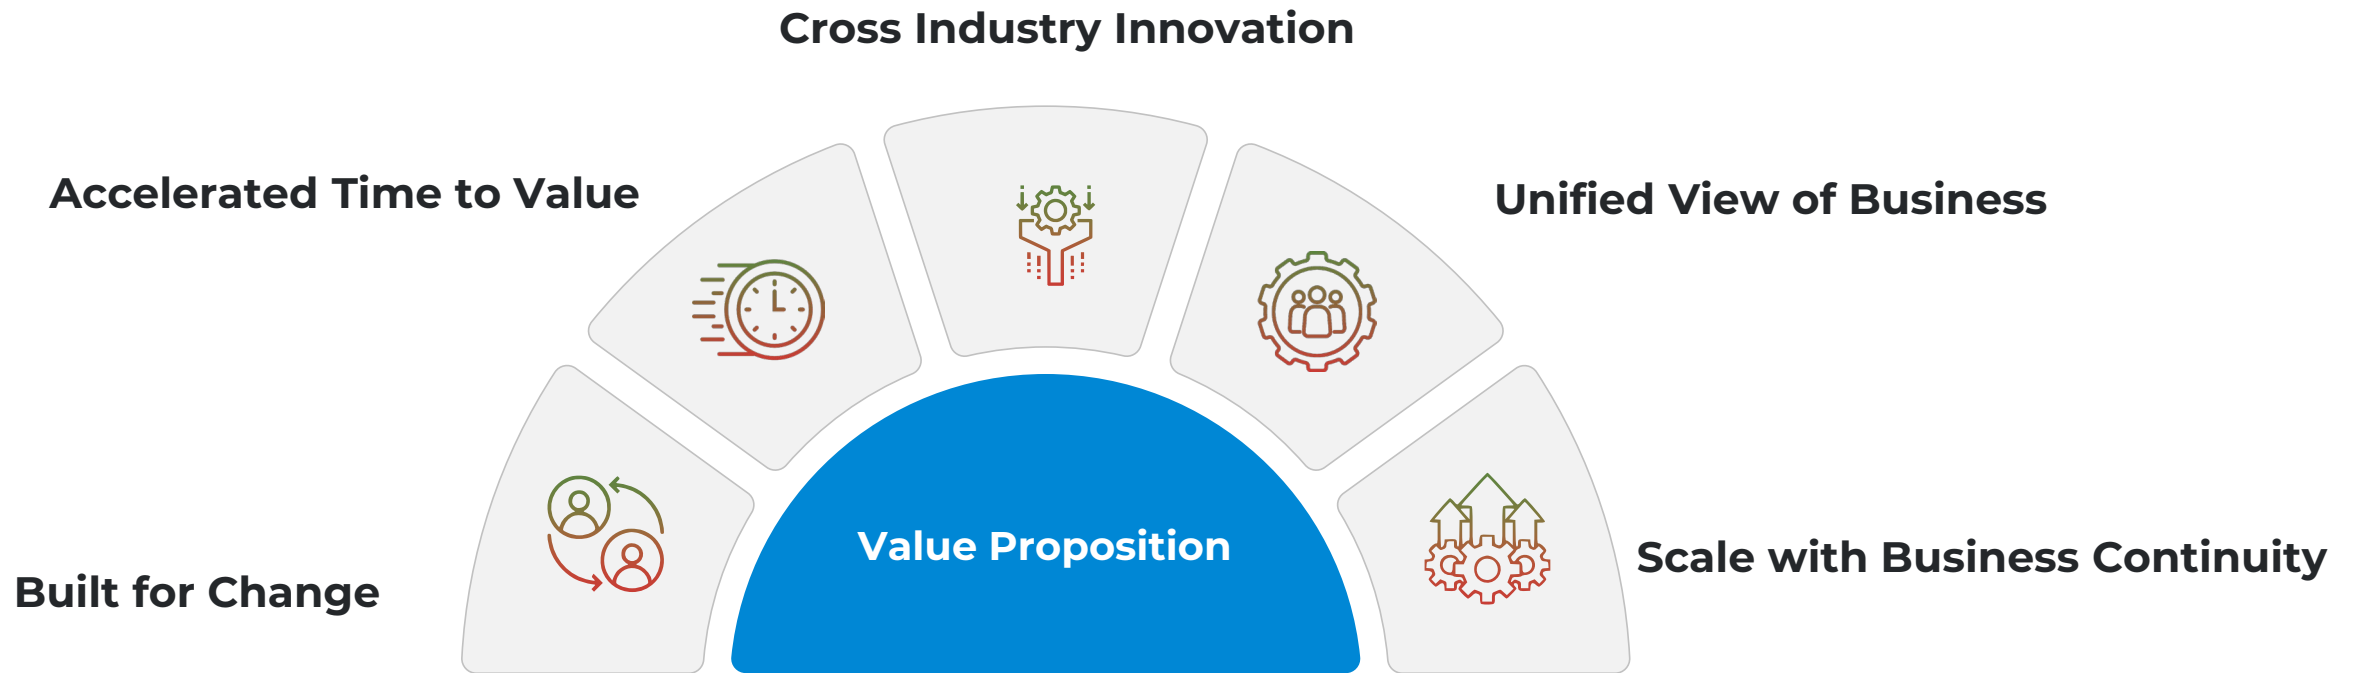

Handles technical operations including **backup and disaster recovery**, **system maintenance**, **data protection**, and **best-in-class uptimes** to give you peace of mind

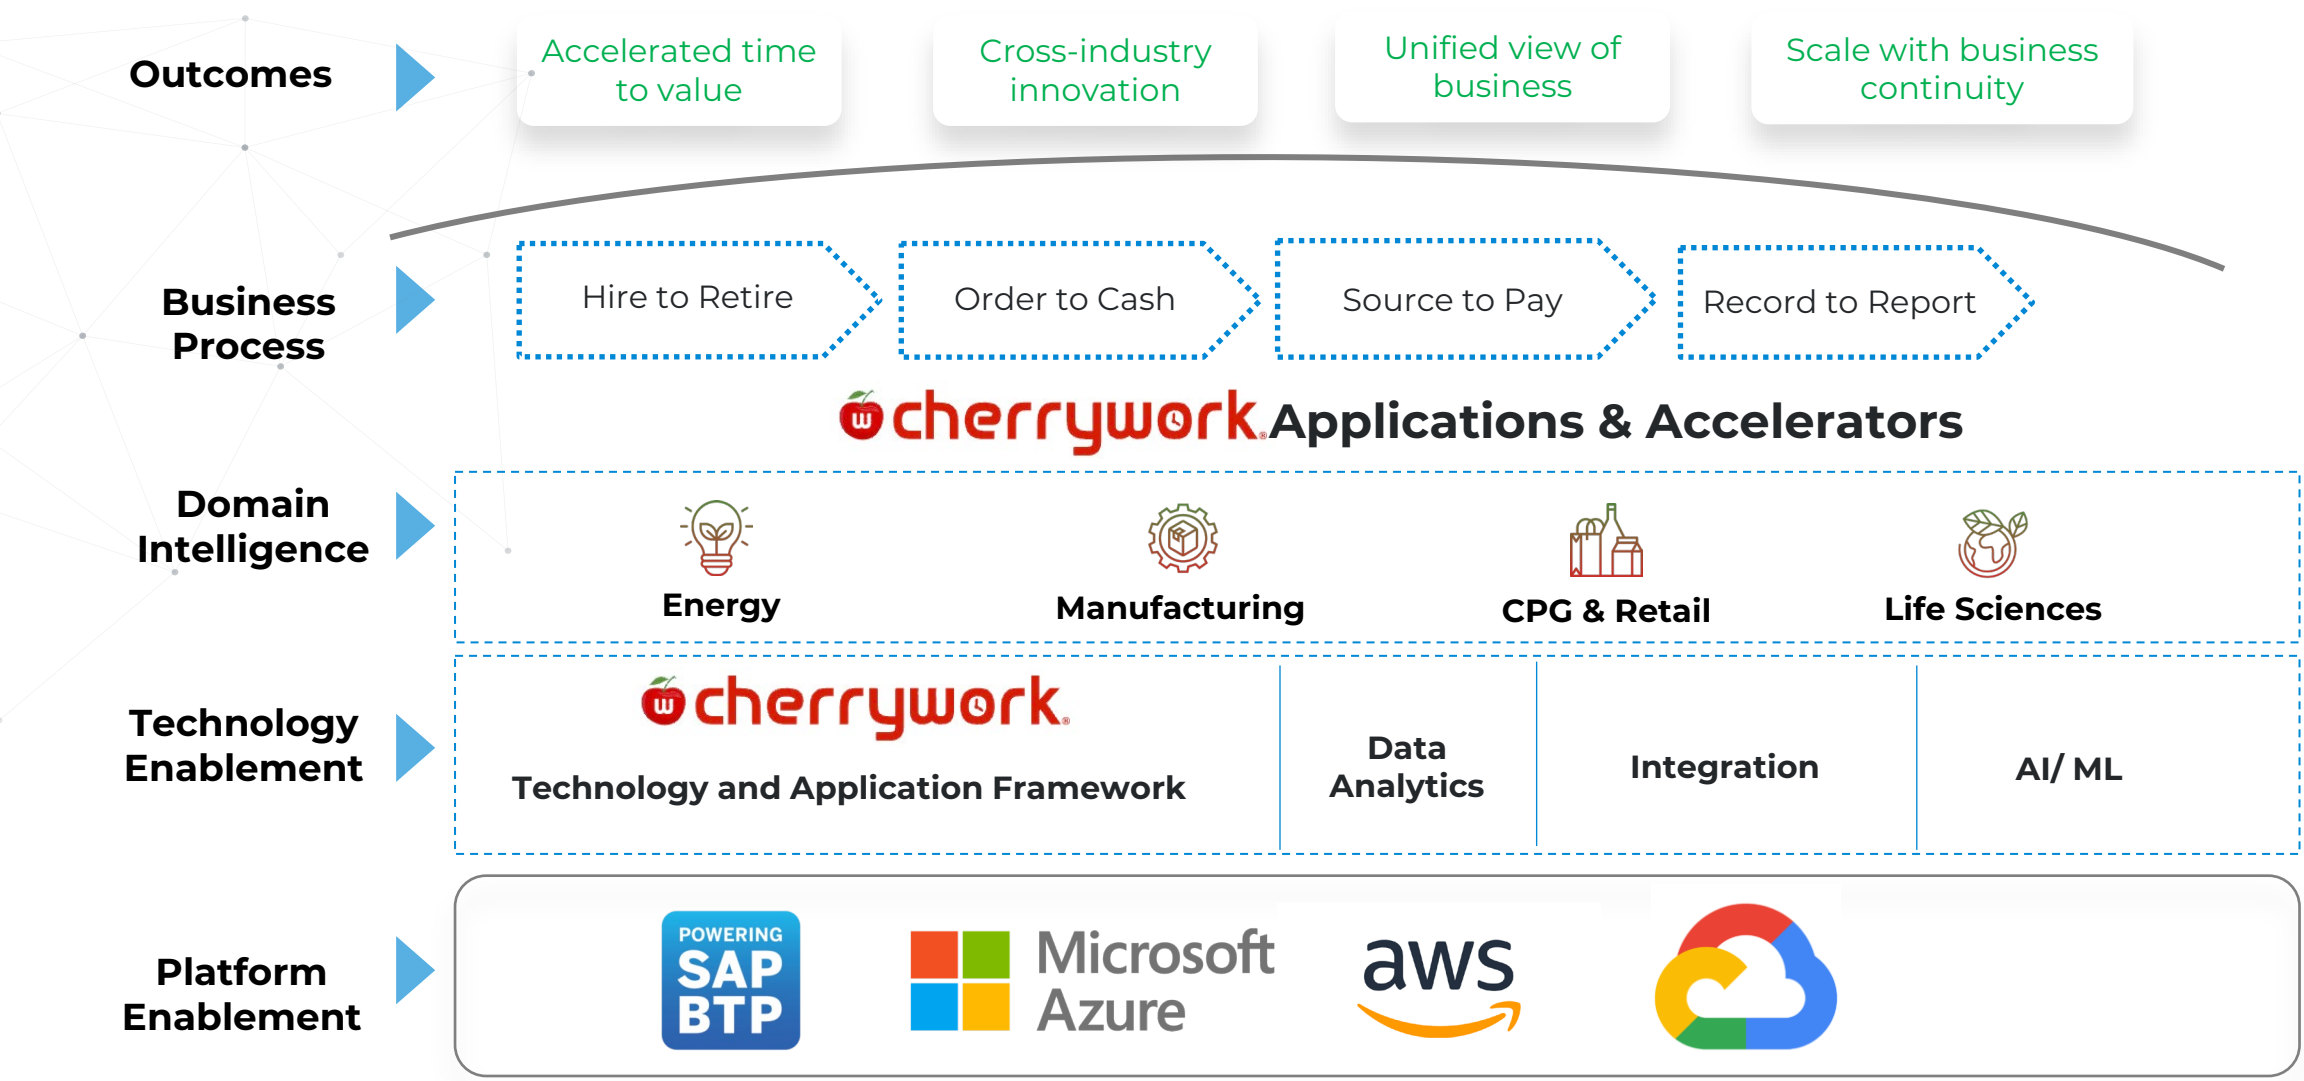

Open and extensibility

Easily extensible to create solutions that fit your business

Digital Portfolio Value Proposition

Transforming the Enterprise with Digital

Industries

Consumer Goods & Retail

Synergistic. Smart. Scalable

Moving forward with digital technology to build intelligent customer products

Business Challenges

- ❑ Consistent, fast, and easy experience through mobile
- ❑ Leveraging new technologies, such as location-and context-aware mobile solutions
- ❑ Better management of multiple suppliers, prices and orders
- ❑ Resolving problems quickly to reduce loss of services
- ❑ Providing consistent customer & employee experience across all channels
- ❑ Building digital applications, associated analytics, and expertise to harness in-store and online data
- ❑ Reducing costs with better technology infrastructure management

Industry Offerings

- Master Data Governance
- New Product Introduction
- Smart Order
- Price Management
- In-store Perishables Management
- Product Returns Management
- Track & Trace
- Rebate Management
- Receivables Management
- Intelligent Maintenance & Operations
- Smart Warehouse
- Intelligent Manufacturing
- Intelligent Supply Chain
- Customer Experience
- Human Experience Management

Energy 4.0

Safe. Reliable. Sustainable

Driving intelligent innovation in the oil and gas landscape

Business Challenges

- ❑ Increasing visibility into complex operations to control costs and optimize the performance of employees, facilities and assets
- ❑ Improving collaboration with field services to improve logistics
- ❑ Making the connection between improved asset management and execution excellence
- ❑ Creating networks of excellence and enable knowledge transfer to maximize operational excellence
- ❑ Improving employee productivity and connectivity in a cost-effective manner

Industry Offerings

- Intelligent Maintenance & Operations
- Smart Warehouse
- Intelligent Manufacturing
- Intelligent Supply Chain
- Digital Oil Field
- Pipeline Leak & Corrosion Detection Analytics
- Customer Experience
- Human Experience Management

Manufacturing

Innovation. Sustainability. Productivity

Transforming manufacturing ecosystem into a sustainable and modern enterprise

Business Challenges

- ❑ High visibility and control over the entirety of the production process
- ❑ Successfully leveraging new technologies with location-and context-aware mobile solutions
- ❑ Better management of multiple suppliers, prices and orders
- ❑ Resolving problems quickly to reduce loss of services
- ❑ Building digital applications, associated analytics, and expertise to harness data across multiple systems
- ❑ Reducing costs and better management of technology infrastructure

Industry Offerings

- Intelligent Maintenance & Operations
- Smart Warehouse
- Intelligent Manufacturing
- Intelligent Supply Chain
- Intelligent Procurement
- Intelligent Work Management
- Customer Experience
- Human Experience Management

Intelligent. Economical. Transformational

Enabling breakthroughs in Life Sciences with digitally integrated Solutions

Business Challenges

- ❑ Digitally transforming the supply chain and manufacturing process to allow for a personalized patient approach and therapy treatments that improve the quality of life
- ❑ Improving experience and workforce efficiency by using data analytics for process optimization
- ❑ Building the future of healthcare with automation and innovation to give patients complete control with smart devices
- ❑ Creating transformative ecosystems that use big data to create a seamless connection between suppliers, contractors and regulatory agencies

Industry Offerings

- Master Data Governance
- Intelligent Maintenance & Operations
- Smart Warehouse
- Intelligent Manufacturing
- Intelligent Supply Chain
- Intelligent Work Management
- Customer Experience
- Human Experience Management

A photograph of four business professionals in an office setting. On the left, a man in a dark suit and light blue shirt is shaking hands with a woman on the right who is wearing a dark blazer. In the center, a woman with long dark hair, wearing a light blue shirt and a grey blazer, is smiling. To her right, another woman with brown hair in a ponytail, wearing a dark blazer, is looking towards the handshake. The background is a blurred office interior. There are semi-transparent green and blue rectangular overlays on the image. The text 'Customer Engagement Methodology' is centered in white.

Customer Engagement Methodology

Business Value Approach

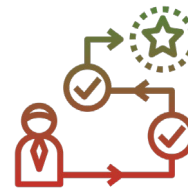

Align & Mobilize

- Articulate business challenges and outcomes
- Set engagement direction and expected results
- Align on scope, resource and timeline

Discover & Build Case for Change

- Conduct stakeholder experience discovery
- Uncover pain points and opportunity areas through experience and process discovery
- Learn the technology landscape
- Identify key initiatives and develop case for change

Show the Path Forward

- Build roadmap based on identified initiatives
- Demonstrate the solution with a focus on top value areas
- Validate business case with stakeholder and sponsors
- Arrive at Go/No Go decision

Deliver on the Promise

- Customer success scorecard creation
- Value realization and optimization
- Measure actual value from technology investments

applications

Reimagining business models : Accelerate time-to-value with agile deployment, configuration, and integration

Data-driven decision making : Deliver business outcomes with Intelligent data-driven insights

Built for purpose workflow tools : Collaborate with team members through a unified workspace

Real-time visibility : Enable quick decisions by tracking key performance indicators

Workflow efficiency : Increase user adoption with a simplified and personalized digital experience

Customer Success Stories

Customer Success Stories - 1

Plant Maintenance Application for a Global Pharmaceutical Company headquartered in the US

25% Reduction in time for safety critical inspections

20% Increase in employee engagement

New Product Introduction for a Large multinational Consumer Goods Company

3000+ Key users

~60% Reduction in time to market

160+ Countries rollout

Predictive Asset Analytics for a Leading Utility Company in the US

<3% Reduction in overall pole failures

60% Reduction in manual inspection

90% Accuracy in prediction of pole failures

Data Lake & Integration Platform for one of the Largest Toyota Distributors in the Middle East

2.6 M Increase in annual revenue

3k Increase in service bookings per day

2.3 M B2C customers

UI Modernization Project for a Multinational public sector bank in India

22% Increase in user adoption

20% Increase in employee productivity

Unified Supplier Portal for a Large Truck Manufacturer in the US

100% Dependence on paperwork eliminated

360 ° Visibility of delivery, stock and collections

Supplier Onboarding Application for an Agribusiness Conglomerate

3X Improvement in velocity of onboarding new vendors

40 New suppliers onboarded per month

40% Savings due to digitalization

Proof of Delivery App. for a Leading Grocery Chain in the US

100% paperless process

360 ° Visibility of delivery cycle, stock and collections

Intelligent Task Management App. for a bottling group of the Coca-Cola Company

30% Increase in productivity

360 ° Visibility of tasks

1100+ Happy end users

EDI Modernization for one of the Largest Confectionery Manufacturers in the US

35% Rationalization of the overall EDI maps

2X Faster onboarding on trading partner management solution

Integrated Operations Platform for an Upstream Oil and Gas Company in the US

12% Cycle Time Reduction

24M Events processed from 800 wells to provide comprehensive view

10% Improved health and safety

Integrated Global Procurement Application for a Leading Agribusiness Company in the US

500+ Global users across procurement finance and engineering

4:1 Global procurement center consolidation

100% Elimination of manual purchasing process
