Datasphere Integration with GCP

Unleash the power of business data with SAP Datasphere

Access
authoritative
data

- Deliver business data in its business context
- Make it effortless to model your business
- Ensure governance throughout the data lifecycle

Enrich all
data projects

- Virtually access or physically store data from anywhere
- Leverage trusted data partners and securely share data across the organization
- Integrate with industry-leading data and AI platforms to capitalize on data investments

Simplify the
data
landscape

- Innovate across hybrid architectures leveraging existing SAP models
- Enable self-service data access
- Leverage existing SAP BW models and transformations to innovate in the cloud

Use Cases

Analytics Platform for Laboratory Users at a leading Snacking/Chocolate CPG company

- Transformed a hybrid laboratory's data landscape by ingesting and building a robust Data Warehouse.
- Integrating systems like S/4, PLM, Kleanz, QMS, and SQM, empowered the product quality department with insightful Business KPIs.
- Seamless SAC integration with Datasphere enables self-service BI/analytics for efficient decision-making.

HR Analytics Pilot for Leading US Railroad Company

- Seamlessly connected and harmonized disparate data sources (FMP, SAP SF, ECC, Flat-files) using Datasphere.
- This enabled the creation of tailored Business KPIs, empowering leaders for strategic decisions.
- Further, SAP Analytics Cloud integration via Datasphere facilitated self-service BI, empowering business users with real-time, independent data exploration.
