

Fashion Manufacturing

Elevate Your Fashion Manufacturing

Are you struggling with disconnected systems, production bottlenecks or procurement headaches? It's time to transform your operations with our cutting-edge, integrated solutions designed for **precision and efficiency** in complex manufacturing environments.

MTO Change Order Management: Master 'Made-to-Order' Flexibility

Gain **unparalleled control** over your Made-to-Order (MTO) modifications. Get a **consolidated view** of all MTO data, precisely manage changes to **Production Orders** that are currently in its pre-production phase, undergoing final refinements.

Generic Article Planning - Production Workbench: Streamline Your Production

Seamlessly view, manage, and control both **Planned Orders** and **Production Orders**. Instantly visualize demand and **effortlessly convert Planned Orders**. Plus, fine-tune production quantities, eliminate **rounding variances**, and apply **mass fixes** to save time.

Manage Fashion BOM: Master Your Production Workflow

Streamline your fashion Bills of Material (BOMs) with an intuitive system for precise creation, change, and display. Enjoy **seamless BOM creation** with meticulous detail, including **Assembly BOMs**. Gain **transparent BOM display** with comprehensive views for all variants. Make **dynamic BOM changes** directly within generic articles or variants, giving you full control over complex structures.

Generic Article Planning - Procurement Workbench: Optimize Your-Procurement

Unlock **unprecedented visibility and control** to drive efficiency and optimize costs. Our workbench offers dual power: a strategic overview with **Generic Article Planning** and granular control with **Component Planning**. Get **real-time status** on components, adjust impact of rounding on MRP-generated Purchase Requests to cut waste, and generate **Purchase Orders** on demand.

Procurement Budget Forecasts can be made for generic articles at component level, providing insights into component spending of Generic Article and enabling valuable spend forecast.

AI embedded Chatbot

AI embedded Chatbot simplifies queries in **natural language**, and provides **real-time insights** tailored to your needs. Empower your team to access data, analyze trends, and make faster decisions, boosting **efficiency** and **agility** today.

Ready to revolutionize your BOM maintenance activities, manufacturing, procurement and MTO change order management?
