

Optimize Your Procurement: Precision Planning with Generic Article Procurement Workbench

Unlock Unprecedented Visibility and Control to Drive Efficiency and Optimize Costs

The Procurement Challenge: Are You Ready?

Today's fast global economy demands strategic planning, real-time insights, and proactive decisions for procurement. Are you struggling with excess inventory, component shortfalls, or poor material visibility? Master end-to-end procurement with our powerful, state-of-the-art

Generic Article Planning - Procurement Workbench.

Dual Power: Generic Article & Component Planning

Get precise details with our intuitive interface's two powerful planning options.

Generic Article Planning: Your Strategic Overview

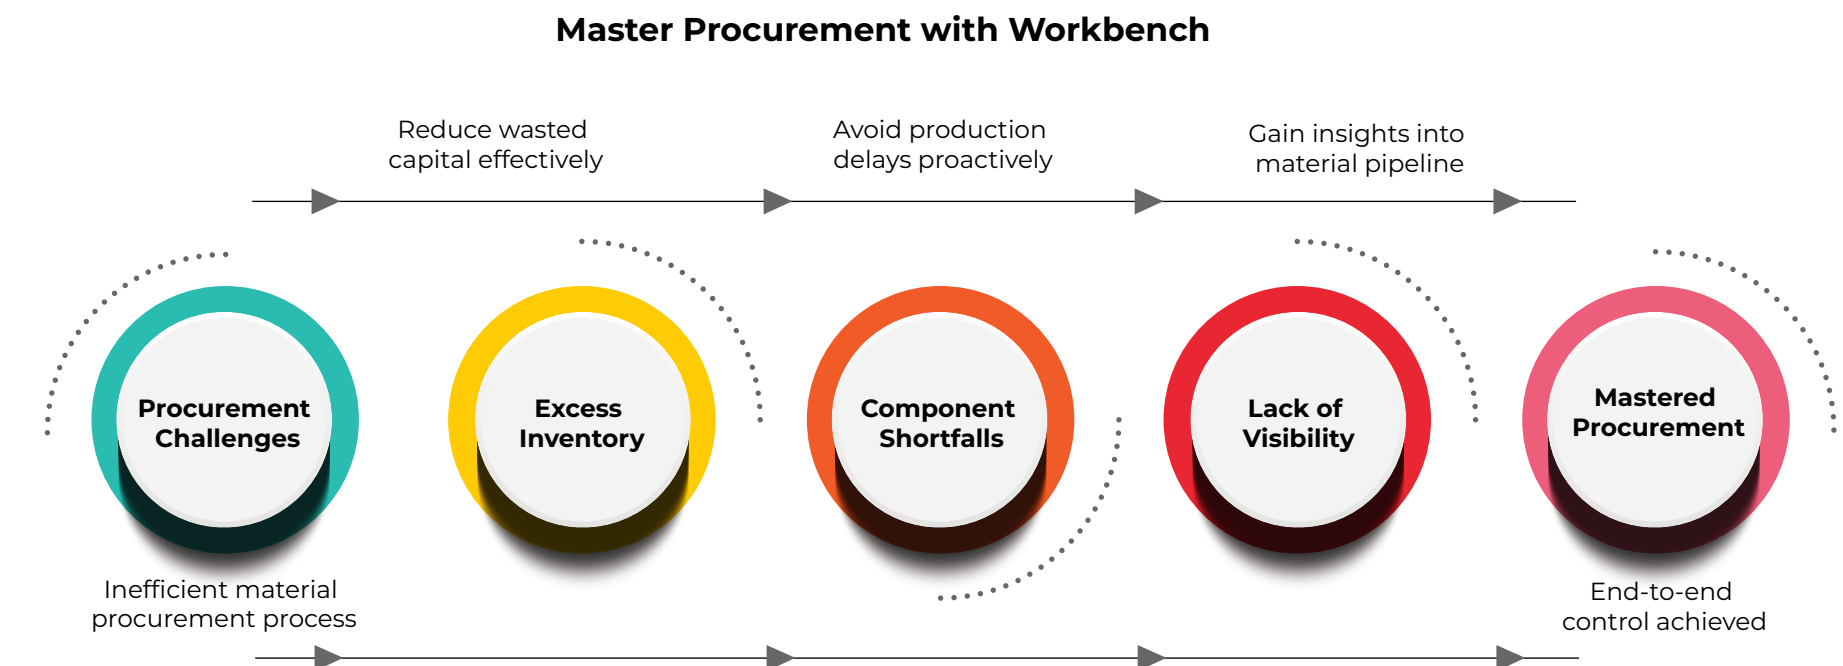

For a holistic view of your procurement landscape, Generic Article Planning is your go-to.

- **Effortless Status Check:** See material procurement status fast.
- **Intuitive Filtering:** Simply select a delivery date range to narrow down your focus.
- **Comprehensive Component List:** Instantly view all BOM components for generic articles.
- **Proactive Problem Solving:** Identify bottlenecks to keep production on track.

Component Planning: Deep Dive & Operational Excellence

Gain granular control on the Component Planning tab.

- **Real-Time Status:** Get precise component procurement status.
- **On-Demand Purchase Order Generation:** for component shortfalls, ensuring availability.
- **Comprehensive Data:** View current stock, order reservations, purchase requests, purchase orders, and all related business objects.
- **Smart Purchase Request Modification:** Adjust MRP-generated Purchase Request quantities to cut waste and costs.

The Master View: Your Data, Unveiled

Our Master View shows generic components intuitively:

- **DEP REQ:** Dependent requirement quantities for an order.
- **PLD ORD:** MRP-generated planned order proposals for demand.
- **CUST ST:** Customer order quantities.
- **PIRs:** Forecasted material demands.
- **STOCK:** On-hand inventory.
- **PO Item:** Quantities from open Purchase Order
- **PUR RQS:** Purchase requests within the delivery date range.
- **ORD RES:** Item quantities reserved for production orders.

Procurement Workbench Key Benefits
