

Manage Fashion BOM: Onboard seamless User Experience

Streamline your fashion BOMs! Our intuitive system helps you create, change, and display BOMs precisely for efficient manufacturing.

Seamless BOM Creation

Effortlessly create accurate BOMs, the foundation of successful production.

- **Meticulous Detail:** Generate incredibly detailed BOMs for your generic articles.
- **Component Control:** Easily **add individual components** or remove them with a simple click.
- **Assembly BOMs:** Dive deeper into your product structure by creating **Assembly BOMs** for sub-components, providing a granular view of your material needs.
- **Efficient Uploads:** Simply **download a pre-formatted template**, populate it with your data, and upload it back into the system to instantly create your BOMs.

Transparent BOM Display

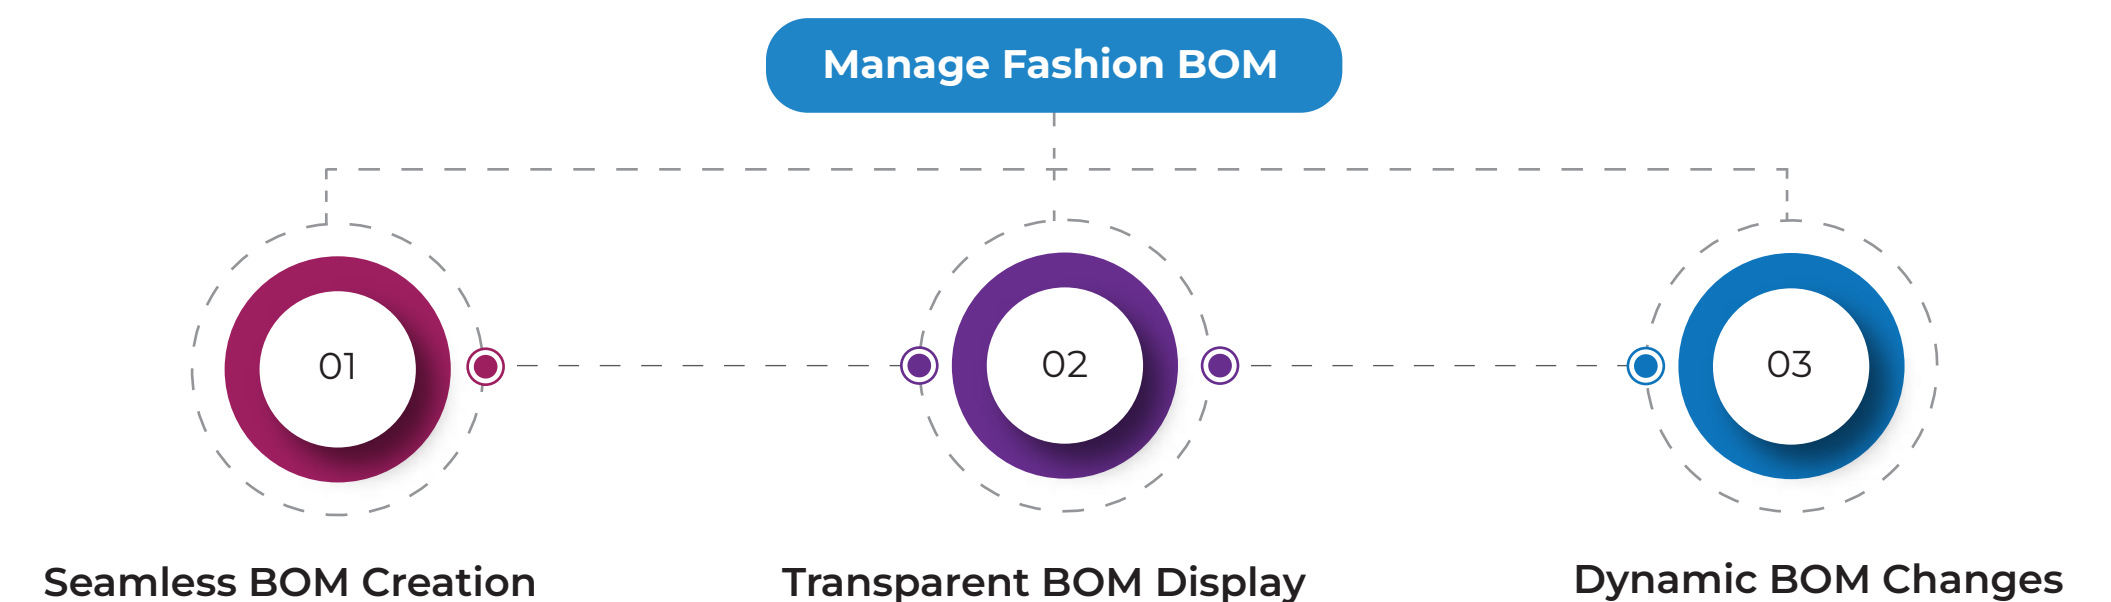

Gain full visibility and align all stakeholders.

- **Comprehensive View:** Access a full breakdown of your **Generic Article BOM**, showcasing all component details at a glance.
- **Variant Insights:** Switch to the **Variant BOM tab** to view specific component details for all your product variants.
- **Assembly Visibility:** Easily **view Assembly BOMs** for both generic articles and their variants, understanding how sub-components flow through your designs.
- **Effortless Export:** Standardize BOM modifications by leveraging ready-built templates and importing data directly from it, ensuring consistent and efficient processes.

Dynamic BOM Changes

Modify BOMs easily to adapt to design iterations and material availability.

- **Generic Article Flexibility:** Directly **change, add, or delete components** within your Generic Article BOM.
- **Assembly Modifications:** Our system allows for direct **modification, addition, and deletion of Assembly BOM details**, giving you full control over complex structures.
- **Variant Specificity:** Navigate to the **Variant BOM tab** to make targeted changes to components and their details for individual variants.
- **Template Updates:** Just like creation, you can **upload a spreadsheet template** to apply comprehensive changes to BOM component details.
