

AGCO builds products to service the world's agricultural community and sources components from more than 3,000 suppliers around the world.

## Integrated Global Procurement Application for AGCO

### Challenge

- Regionally distinct and disconnected solutions made it impossible for AGCO's purchasing personnel to budget, manage, and execute procurement
- AGCO's vision was to increase global data transparency with a new, cloud-based application that can integrate data from both the purchasing and finance functions
- AGCO needed a partner with deep knowledge and implementation expertise of SAP Cloud Platform & Technologies to create this application

### Solution

- A single, integrated global purchasing and savings application built on SAP® Cloud Platform was designed to manage the company's global supplier spend, enable better forecasting and budgeting, and eliminate manual processes

### Outcome

- More than 500+ purchasing and finance professionals – working around the globe – now rely on an integrated global solution to manage spend, savings, and budgeting
- End-to-end visibility into purchasing operations with a single portal for global supplier interactions
- 3,254 savings initiatives tracked in APT in 2020
- 10K+ Nos. of PCAs processed in 2020
- \$3.5B Procurement through APT for 2020
- 314K Nos. of parts with a price change in 2020

### Business Impact

**500+**

Global users from procurement, finance, & engineering

**4:1**

4 Regional procurement centers to 1 Global procurement center

**100%**

Elimination of manual purchasing processes
